NGUYEN TAN LOC

Software Engineer

Ho Chi Minh City | tanlocnguyendev@gmail.com | 0362 447 457 | tanlocnguyendev | colnat412

SUMMARY

Software Engineer specializing in the TypeScript ecosystem, with core expertise in **NestJS** and **React.js**. Adept at building scalable web applications, robust CRM/BI platforms, and real-time features, leveraging modern databases and containerized deployment for end-to-end delivery.

EDUCATION

Industrial University of Ho Chi Minh City Oct 2021 – Dec 2025
Major: Software Engineering

SKILLS

Programming Languages: TypeScript, JavaScript.

Frameworks & Libraries: **NestJS**, **Node.js**, React.js, Next.js.

Databases: MySQL, PostgreSQL, MSSQL.

Cloud & DevOps: Docker, Digital Ocean.

Version Control: Github, Gitlab.

Others: Figma (basic), Design Pattern.

EXPERIENCE

HANBIRO VIETNAM COMPANY Aug 2025 – Present
Role: Web Developer

Project: Dongsung Motors (Automotive CRM)
An automotive CRM system for managing vehicle inventory, sales processes, and customer-related operations.

- **Tech Stack:** NestJS, React.js, PHP, AngularJS, MySQL.
- Migrated legacy PHP/AngularJS CRM to **NestJS & React.js**, improving system scalability and maintainability.
- Developed the end-to-end "Sales New" module (APIs & UI) for inventory and sales tracking.
- Optimized MySQL queries and backend architecture to smoothly handle **100K+ records** and high daily traffic.

Project: KMG Automotive
An automotive business platform including a CRM system and a vehicle sales website.

- **Tech Stack:** NestJS, React.js, Next.js, MySQL.
- Maintained and resolved legacy bugs in the system, improving system stability and user experience.
- Designed and implemented a dashboard statistics module, building both frontend UI and backend APIs to provide business insights.

Project: BI System
A business intelligence platform for importing datasets and creating analytical charts for data visualization.

- **Tech Stack:** NestJS, React.js, PostgreSQL.
- Contributed to the development of a BI platform enabling users to manage workspaces and perform data analysis.
- Implemented UI components and backend APIs for creating charts from imported data files.
- Designed API logic for dynamic data visualization and chart generation.

G&BSOFT COMPANY LIMITED Jan 2025 – Apr 2025
Role: Fullstack Developer Internship

- **Tech Stack:** Next.js, ASP .NET, .NET Framework, MSSQL.
- Contributed to enhancing an asset management system for a university by replacing outdated features (e.g., barcode scanning) with more user-friendly solutions like QR code integration and an improved UI aligned with real-world workflows.
- Conducted research on logistics operations for a shipping client (**BBC Chartering**), focusing on port activity, fuel usage, and vessel data. Assisted in developing metadata-related interfaces and gained practical insights into logistics processes.

PROJECTS

CHAT SYSTEM
Role: Backend Developer - **Team size:** 2
Source: https://github.com/colnat412/chat-system

- **Tech Stack:** NestJS, Socket.IO, MongoDB, PostgreSQL, Redis, Firebase.
- Developed and maintained scalable APIs for chat and room management, supporting seamless communication and consistent data handling across multiple storage layers.
- Implemented core room features such as member management, role-based permissions (including adding, removing, and kicking members), and room lifecycle actions. Integrated real-time capabilities using WebSocket with **Redis Pub/Sub** to ensure instant synchronization and responsiveness across clients.

LEARN MANAGEMENT SYSTEM
Role: Frontend Developer - **Team size:** 2
Source: https://github.com/colnat412/learn-mgmt-system

- Designed and built the UI/UX for a course management app using Next.js and Tailwind CSS, enabling full CRUD operations and smooth course publishing with animations.
- Implemented features for uploading and previewing multimedia content such as images, audios, videos, and PDFs, improving content management and user experience.

ACHIEVEMENTS

AUN-QA: Represented the university in the **AUN-QA** assessment interview Nov 2024
Scholarship: Awarded 50% tuition scholarship Dec 2024
